

## BLUE STEEL

### The Economical, High Strength, High Tenacity All-Purpose Super Utility Rope

BLUE STEEL™ is one of the strongest copolymer ropes in the market. It offers low elongation and twice the wear life of standard polypropylene. Constructed from high strength, high tenacity polyolefin yarns, BLUE STEEL™ offers excellent resistance to abrasion, UV light, rot, mildew and most common chemicals. With a specific gravity of 0.91, this rope floats and will not absorb water. Easy to handle and splice.

#### Features:

- 30-40% stronger than standard polypro rope of comparable diameters
- Great UV and abrasion resistance
- Available in a variety of put-ups, 8 braid and 12 strand
