

Polyester Tuff-Edge Slings

CWR Hawaii's Polyester Tuff-Edge Eye and Eye slings can be used in choker, vertical, and basket hitches. You can expect longer sling life and lower costs when you switch to Tuff-Edge slings. Resistance to abrasion and edge cutting is greatly improved over the normal nylon and polyester slings. Custom lengths and designs available upon request.

Stock Number	Width	 Vertical	 Choker	 Basket 90°	 Basket 60°	 Basket 45°	Eye Length
	(inches)	<u>Working Load Limit (lbs.)</u>					(inches)

Polyester Tuff-Edge Slings

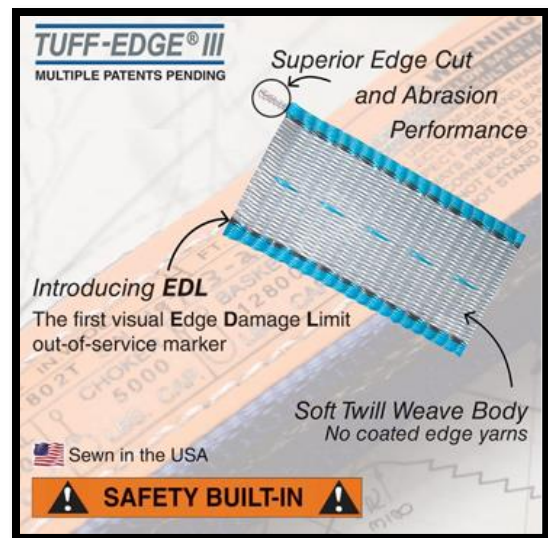

The Benefits of CWR's Polyester Tuff-Edge Slings

TUFF-EDGE III Webbing

- Multiple Patents Pending
- Visual Edge Damage Limit Marker
- Superior Edge Cut and Abrasion Performance
- Soft Twill Weave Body
- No Coated Edge Yarns
- Treated Webbing

Polyester Webbing

- Half the stretch as nylon webbing
- No loss of strength when "wet". Nylon slings lose up to 15% strength when "wet".
- Retains greater tensile strength with prolonged exposure to ultraviolet light compared to nylon.

Heavy Duty Detailed Tags with Warnings

- Serial Numbered – Traceability and Tracking
- Hitch Diagrams – Easier to understand
- Warning tags – Information to protect sling users
- Laser Imprinted Tag – The most durable tag available

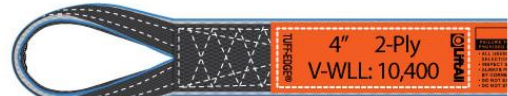

Fully Wrapped Eyes

- Eyes are fully wrapped to protect from wear and tear
- Eyes are also tapered to provide proper relationship between sling eyes and hardware
- Half Twist Eyes, for better alignment when using in a choker or basket configuration.

Extra Sewn Body Lines

- Creates a flatters sling and helps to prevent bunching within the body.

Made in the USA

- Slings are made in the USA and meet or exceed all OSHA and ASME standards.
